

TOP LEVEL FOLDER ('Intern Notes')

File Name	Summary
Database Catalog Report	A document outlining the schema and row counts for the open_payments database, specifically detailing tables for General Payments data from 2020, 2021, and 2022.
Tech Stack	Documents the server attributes and installed software for the SunshineSpend Team Server Stack, including OS, kernel, hosting, networking, and various software versions.
Quickstart	A quick start guide for interns on setting up autoreload for PHP, Flask, and Node.js applications, and connecting to MySQL in the SunshineSpend team server environment.
Datasets / Databases	Provides an overview of online CMS Open Payment datasets and the structure of the open_payments and open_payments_ref MySQL databases on the server.
Server Overview	Explains the components and request flow of the SunshineSpend intern server, focusing on the chatbot functionality, Flask API, OpenAI proxy, and MySQL database.
Chatbot 'How To' Guide	A guide on how to query ChatGPT, call a remote API, and query MySQL within the team environment, providing code examples for each action.
Intern Guide	A guide for interns using the SunshineSpend intern server, outlining where to work, available helper functions, and quick start commands for sending questions to the chatbot.
Embedding Analytics	Discusses various ways to dynamically display analytics results on a web page, focusing on JavaScript chart libraries and embedding business intelligence tools.
