

'PHYSICIAN LOOKUP' SUBFOLDER

File Name	Summary
physician_license_aggregator_starter.zip	This ZIP archive contains a starter kit for a physician license lookup aggregator. It includes Python scripts to search physician licensing information nationwide, primarily by querying FSMB's DocInfo.org, and provides pluggable adapters for integrating specific state board searches (with Florida and Texas included as stubs). The kit generates a CSV/XLSX output with normalized results and outlines architectural components like app.py, adapters/docinfo.py, and data/state_urls.json. It also includes requirements.txt and notes on setting up the environment, running searches, and important caveats regarding HTML changes, CAPTCHAs, and responsible use.
Physician Finder Notes	This document provides notes and resources for finding physician information. It references CMS's VPL and NPPL, NPPES (National Provider Identifier Registry) API and database, and a Google Sheet titled 'US_Physician_License_Lookup.xlsx'. It also highlights DocInfo.org as a key site and introduces a starter script for a physician license lookup aggregator (the physician_license_aggregator_starter.zip file), detailing its quick start steps and emphasizing the need for manual intervention or adherence to terms of service for certain state sites.
US State Physician License Sites.xlsx	This spreadsheet lists all US states along with their corresponding public license lookup URLs for physicians. It provides a comprehensive reference for directly accessing each state's online license verification portal.
